GENERATES
HUGE
SOLUTIONS

A 3D rendering of a complex mechanical contraption, resembling a Rube Goldberg machine. It features four horizontal levers of varying lengths, each supported by a central pivot point. The levers are arranged in a cascading fashion, with each successive lever being higher and further to the right. Several large, highly reflective, metallic spheres are placed on the levers, some at the ends and some in the middle. The spheres are arranged in a way that suggests a sequence of events or a chain reaction. The background is a plain, light gray gradient. The overall aesthetic is clean and modern.
